# 1. Introduction

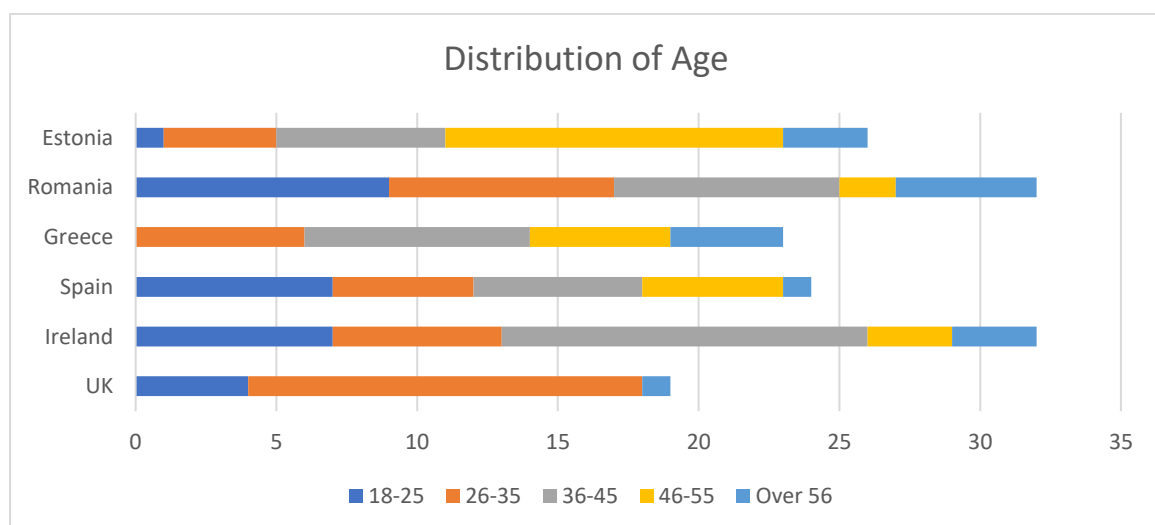

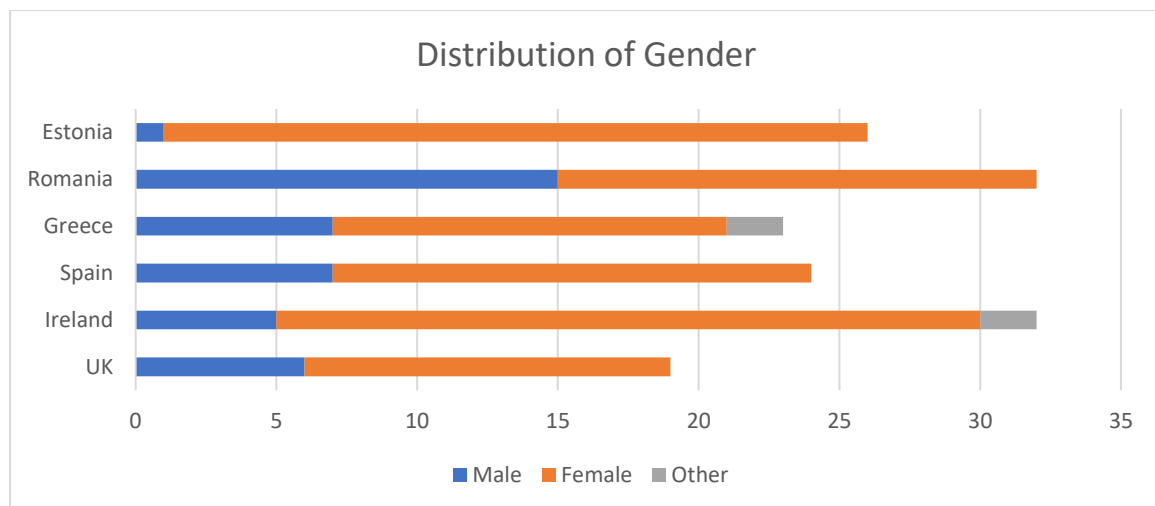

## 1.1 Methodology

This comparative analysis is part of IO1A2, and its main objective is providing a graphic and easy-to-access approach to the results of the different surveys conducted in the partner countries of HORECA project. For each question of the survey, two graphics have been designed: one aiming at a comparison of the results between countries; and the other one providing a global view of the answers.

The first part of this report will be used as a sample to show how this approach works (comparison and global), while the rest of the report will solely provide the benchmarked information.

## 1.2 Participants

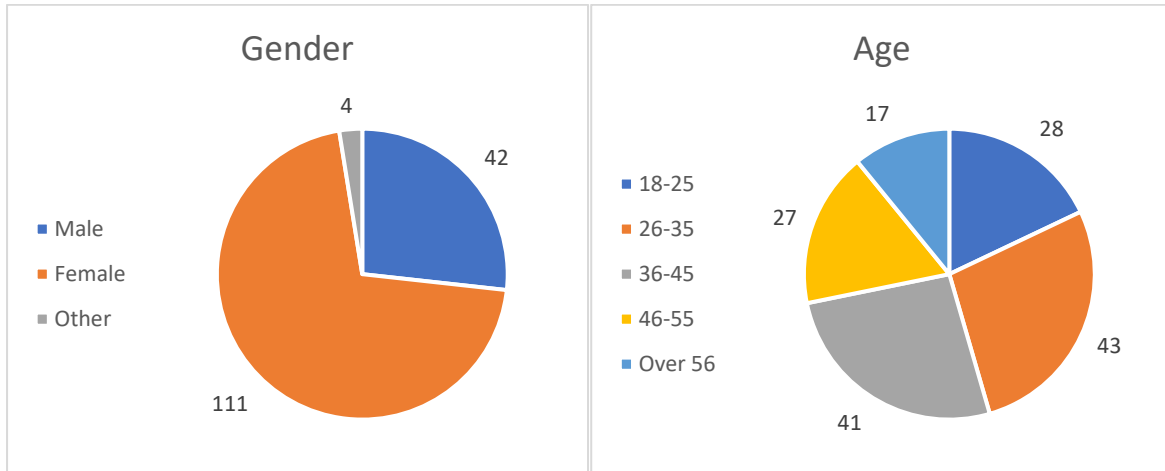

*Comparison of the results*
